

Sustainability Lecture Series

What is needed to transform agriculture and food systems in the face of climate change?

Sustainability Science Centre presents a sustainability lecture on 22 September 2017, with Bruce Campbell, Director of the CGIAR Research Programme on Climate Change, Agriculture and Food Security (CCAFS) and a staff member of the International Centre for Tropical Agriculture (CIAT).

This lecture will address how something is wrong with the global food system when nearly one billion people go hungry and more than one billion over-consume; and how agriculture is the major driver of global environmental change.

Dr Bruce Campbell has degrees in Ecology from Cape Town, Minnesota and Utrecht, but has increasingly moved into inter-disciplinary work, championing new approaches to doing applied research on natural resource management. He operates out of the CCAFS office at the University of Copenhagen in Denmark.

Katherine Richardson, Professor and Leader of Sustainability Science Centre, will moderate the talk.

Practical Information:

Time: 22 September 2017, 14:30-15:45

Place: Aud - A2-70.03
Thorvaldsensvej 40
2000 Frederiksberg

Admission is free, registration at:
