

# Sustainability Lecture Series

## Pathways to 100% Renewable Energy -The electrification of all sectors

Sustainability Science Centre, in cooperation with the American Embassy in Denmark, is proud to present a sustainability lecture on 17 May 2018, with Angelina Galiteva, founder and Chair of the Board for the Renewables 100 Policy Institute, and Renewable Energy Expert Speaker for the US Department of State.

**This lecture explores how the 6th largest economy, aka California plans to meet its carbon and renewable energy goals as it transitions the economy to GHG free solutions. The focus will be on new programs on the State level to encourage efficiency, demand response, electric transportation, storage and regionalisation of the electricity grid to allow for more intermittent solar and wind power resources to integrate into the power infrastructure.**

**Angelina Galiteva** is an attorney and holds a J.D. and LLM Degrees, specializing in Environmental and Energy Law. She works to structure and advance the implementation of cutting edge energy policies that reflect the increasing role of renewable energy, storage, energy efficiency, electric mobility and distributed energy technologies worldwide.

**Kristian Cedervall Lautu**, Associate Professor at the Center for International Law, University of Copenhagen, will moderate the talk.

### **Practical Information:**

**Time:** 17 May 2018, 15:00-16:15

**Place:** Auditorium 23.0.50  
Karen Blixens Vej 4  
2300 Copenhagen S

**Admission is free, registration at:**  
<http://sustainability.ku.dk>

Sustainability Science Centre cooperates with CBS and DTU through the **Copenhagen Sustainability Initiative, COSI.**
