

Sustainability Lecture Series

Climate management and communication
in a world of "Trumps and Brexits".

Sustainability Science Centre, in collaboration with UCPH's Global Environmental Governance, invite you to a sustainability seminar on 24 March 2017.

Managing climate change is a global challenge and therefore requires co-operation at a global level. Does the current wave of populism on the political arena change the way we need to be addressing climate change? This question will be addressed by a number of different angles in a series of short presentations, followed by Q + A and dialogue between the audience and panel.

Practical Information:

Time: 24 March 2017, 13:30-15:30

Place: A2-70.04, Thorvaldsensvej 40, 1871 Frederiksberg C

Admission is free, registration at:
<http://sustainability.ku.dk>

Moderator:

Katherine Richardson, Professor in Biological Oceanography, Leader of Sustainability Science Centre
